DETAILED ACTION

1. Claims 1, and 5-9 are pending in the application claims 2 and 4 having been canceled by applicants' amendment filed 5/29/07.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harre et al. {Reactive & functional Polymers 41 (1999), pp. 111-114}.

Applicants claim a process for preparing solid phase bonded 2-chlorotrityl chloride of formula I, in the presence of HCl and the organic solvent dioxane.

Harre et al. teach a process for preparing solid phase bonded 2-chlorotrityl chloride, comprising reacting solid phase bonded hydroxylated 2-chlorotrityl in the presence of a chlorination agent (thionyl chloride) and an organic solvent (methylene chloride) (see section 2.2 and 4.1). The difference between the presently claimed invention and what is taught by the Harre et al. reference is that Harre et al. do not teach HCl as a chlorinating agent, the use of other solvent (such as dioxane) besides methylene chloride and reaction times from 6 to 96 hours.

Art Unit: 1621

However, the use of any chlorination agent, solvent and reaction time would have been obvious, absent any unexpected results, to one having ordinary skill in the art.

One having ordinary skill in the art would have been motivated to experiment with different solvents, chlorinating agents and reaction times (depending on cost and availability of such reagents) so as to arrive at optimum results or at the very least arrive at other art recognizable alternative means of preparing the said solid phase bonded 2-chlorotrityl chloride of formula I. The presently claimed invention would have been therefore obvious to one having ordinary skill in the art.

Response to Arguments

Applicants' arguments filed 5/4/07 have been fully considered but they are not persuasive.

Applicants have attempted to overcome the obviousness rejection by amending the claims accordingly and presenting unexpected data (the combination of HCl as the chlorinating agent and dioxane as the organic solvent) included in their reply to the Office Action dated 11/3/06.

However, in order for such unexpected data to be considered compliant and proper, the said unexpected data must be presented in the form of a properly executed Declaration, filed under 37 CFR 1.132. Therefore, the present claims remain rejected for reasons of record given in this Office Action and the Office Action dated 5/4/07.

Art Unit: 1621

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
